***Response to Amendment***

1. Applicant's amendment of February 20, 2004 is acknowledged and entered as paper number 10.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 18, 21, and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Egerdahl.

The patent to Egerdahl shows a dual mode spreader capable of acting as a drop spreader or a broadcast spreader, the spreader comprising:

- a hopper 14 to hold a supply of spreadable material;
- a discharge opening located within the hopper for which the spreadable material can flow therethrough;
- an impeller 54 mounted below the hopper for rotational movement about an upright axis, the discharge opening leading to the impeller to enable the spreadable material in the hopper to exit the hopper onto the impeller to distribute the material in a broadcast manner in a path outwardly therefrom during the rotational movement of the impeller; and

- means for dropping the material downwardly onto the surface to be treated, means for dropping not utilizing the impeller to distribute the material (Column 3, lines 46-68 and Column 4, lines 1-21);
- a first discharge opening 64 and a second discharge opening 24 as recited in claim 24.

***Allowable Subject Matter***

5. Claims 19, 20, 22, 23, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 1-17 are allowed.
